Crown Technology  
5301 Sawyer  
Boise, ID 83714  
208-375-5000

**Crown Technology manufactures a broad range of water-powered chemical proportioning and mixing pumps. Heavy duty component: the ability to customize according to customer requirements assure and trouble-free pump life.**

### **Benefits of the HYDROBLEND® Proportioner**

- **Reduces chemical waste** – The chemical concentrate is diluted as required for performance.
- **Improves proportioning accuracy** – Our exclusive metering principle assures proportioning irrespective of fluctuations in water flow. In most applications, the error is less than 1%.
- **Repeatable formulations** – An adjustable, graduated scale indicates the proportion settings in linear form. Once set, the process can be easily duplicated in future operations.
- **Easy Installation** – The proportioner is water powered and can therefore be located at an isolated water source without electrical connections. (Read installation instructions carefully.)
- **Reliable Operation** – The HYDROBLEND proportioner is a precision-metering instrument manufactured to exacting specifications.
- **Controlled Chemical Usage** – Proportioners can be ordered in a lockable cabinet to prevent uncontrolled access to mixture controls.
